

NLDM

delay / slew tables

Nangate45 example

```
delay_model : table_lookup;  
cell_rise / cell_fall
```

CCS / ECSM

current-waveform models

richer waveform behavior

```
output_current_rise  
output_current_fall
```

LVF

variation statistics

added to timing models

```
ocv_sigma_cell_rise  
ocv_sigma_cell_fall
```

Model families and extensions can coexist in one library
