

HOTPOT:

A **H**ands-**O**n **T**utorial for **P**hysical Design with **O**pen-Source **T**ools

21-23 September 2026 Monday-Wednesday

Learn to use **OpenROAD** tooling for chip design steps including:

- ✓ Netlists, technology files, timing constraints
- ✓ Floorplanning, pin placement, and macros
- ✓ Global placement and legalization
- ✓ Clock-tree synthesis and timing repair
- ✓ Global routing, detail routing, and finishing
